

Appendix 2 Sensitivity analysis using different imputation strategies [posted as supplied by author]

Sensitivity analysis using different imputation strategies for change in apnoea-hypopnoea index (AHI) and weight

Compliers = Patients completing the weight maintenance program

MI = Multiple imputation

LOCF = Last observation carried forward

BOCF = Baseline observation carried forward

Non-compliers with follow-up data = Patients dropping out of the weight maintenance program, but providing measurements at the one year follow-up
